

CYBERSECURITY

365-DAY ROADMAP

Professional Learning & Practice Plan

12-MONTH ROADMAP

Foundation → Web Security → Pentesting → Bug Bounty → Cloud → Binary → Red Team →
Portfolio → OSCP → Career

365 days • 12 months • daily theory + practice + documentation

□ GENERAL SYSTEM (Daily Rules)

- 40% theory (video/text) → 40% practice (lab/platform) → 20% writing (notes + GitHub journal). Every day, make a GitHub "Day-N" commit qil — this will become your future portfolio.
- Main Free Platforms:
- TryHackMe (free tier) — tryhackme.com
- HackTheBox Academy (free modular) — academy.hackthebox.com
- PortSwigger Web Security Academy (100% free, web for eng zo'r) — portswigger.net/web-security
- OverTheWire (Linux/tarmog) — overthewire.org
- pwn.college (binary exploitation, 100% free, ASU kursi) — pwn.college
- picoCTF — picoctf.org
- HTB Academy "Introduction" yo'nalishlari, IppSec (YouTube), John Hammond (YouTube), TheCyberMentor (YouTube)
- OWASP rasmiy hujjatlari, owasp.org

□ MONTH 1: FOUNDATION (1-30)

Day	Topic	Practice	Source
1	Cybersecurity fundamentals, CIA triad	Analyze 3 real attack cases using the CIA triad	HTB Academy "Introduction to Cybersecurity"
2	Terminology: threat, vulnerability, risk, exploit	20 ta atamani write in your own words	TryHackMe "Cyber Security 101"
3	Career paths: Red/Blue/Purple/GRC	Write your 1-year goal map	THM "Careers in Cyber"
4	VirtualBox + Kali installation	Kali + Windows VM tarmoqda connect	TryHackMe "Linux Fundamentals 1"
5	Linux fayl tizimi	/etc, /var, /proc ni study, find with task	OverTheWire Bandit 0-5
6	chmod, chown, SUID, umask	CTF tasks involving permissions	OverTheWire Bandit 6-10
7	Processes, ps, systemctl, cron	Cron job create, processni analyze	THM "Linux Fundamentals 2-3"
8	Bash scripting 1	Port skaner scripti write (bash)	"Bash scripting" — freeCodeCamp YT
9	Bash scripting 2	Write a log parser script	OverTheWire Bandit 11-15
10	TCP/IP and OSI layers	Har qatlamga a real protocol example	THM "Networking" moduli
11	IP addressing, subnetting	20 ta solve subnetting problems	subnettingpractice.com
12	DNS, HTTP/HTTPS	dig, nslookup with real domenni analyze	THM "DNS Manipulation"
13	Routing and firewall fundamentals	UFW with firewall sozlash VMda	HTB Academy "Network Fundamentals"
14	Wireshark fundamentals	HTTP parol sniff lab	THM "Wireshark" moduli
15	tcpdump	Terminalda trafik analyze	THM "tcpdump"
16	Nmap fundamentals	O'z lab tarmog'ini skan qil	THM "Nmap" moduli
17	Nmap ilg'or: NSE, output	NSE scriptlari with skan	HTB Academy "Network Enumeration with Nmap"
18	Windows file system + registry	Registry'da autorun kalitlarini top	THM "Windows Fundamentals 1-2"
19	PowerShell	10 ta script: fayl, process, tarmoq	THM "Windows Fundamentals 3", "PowerShell"

Day	Topic	Practice	Source
20	Active Directory architecture	Domenni chizma qilib draw	HTB Academy "Active Directory Basics"
21	Cryptography fundamentals	Hash turlarini compare, hashcat preview	THM "Cryptography Basics"
22	Hashing vs. encryption	MD5/SHA/AES lab	THM "Hashing Basics"
23	PKI and TLS certificates	openssl with sertifikat analysis	THM "Public Key Cryptography"
24	Malware fundamentals (concept)	EICAR test faylini analiz qil	THM "Malware Analysis" (introduction)
25	SIEM/SOC concepts	Splunk free or Wazuh install	THM "SOC Fundamentals"
26	Password attack fundamentals	John the Ripper with hash crack	THM "Password Attacks"
27	Brute force with Hydra	SSH/FTP brute lab	THM "Hydra"
28	Month 1 CTF day	picoCTF'da 10 ta easy task	picoCTF
29	Bandit final	Bandit 16-25	OverTheWire
30	Month 1 exam	THM Pre-Security path testi + nota	THM

📅 MONTH 2: WEB SECURITY (31-60)

PortSwigger Web Security Academy — bu oyni main manba sifatida ishlat (hammasi free, lablari with).

Day	Topic	Practice	Source
31	HTTP deep: methods, headers, proxy	curl with so'rov manipulyatsiyasi	PortSwigger "HTTP Basics"
32	Burp Suite fundamentals	Proxy/Repeater/Intruder study	PortSwigger "Burp Suite" + THM "Burp Suite"
33	SQL Injection: asos	PortSwigger SQLi labs (5 ta)	PortSwigger SQL injection
34	SQLi: blind, time-based	remaining SQLi lablari (UNION→blind)	PortSwigger SQLi (all)
35	sqlmap	DVWA'da sqlmap with avtomatlashtirish	THM "SQL Injection" + DVWA
36	XSS: reflected	PortSwigger XSS labs	PortSwigger "Cross-site scripting"
37	XSS: stored, DOM	remaining XSS lablari	PortSwigger XSS (continued)
38	CSRF	PortSwigger CSRF labs	PortSwigger CSRF
39	SSRF	PortSwigger SSRF labs	PortSwigger SSRF
40	IDOR	PortSwigger "Access control" labs	PortSwigger Access control
41	Auth bypass + session	PortSwigger Authentication labs	PortSwigger Authentication
42	Fayl yuklash zaifliklari	Upload solutions (extension bypass)	PortSwigger "File upload"
43	Path traversal	PortSwigger LFI labs	PortSwigger "Path traversal"
44	Command injection	PortSwigger OS command injection	PortSwigger OS command injection
45	XXE	PortSwigger XXE labs	PortSwigger XXE
46	SSTI (template injection)	Jinja2 SSTI lab	portswigger.net/blog (SSTI) + THM "SSTI"
47	Business logic	PortSwigger Logic labs	PortSwigger "Business logic"
48	API security (OWASP API Top 10)	crAPI or VAmPI lab	OWASP API Top 10 + THM "API Basics"

Day	Topic	Practice	Source
49	GraphQL security	DVGA lab (GitHub'da free)	THM "GraphQL"
50	Web cache poisoning	PortSwigger cache labs	PortSwigger "Web cache poisoning"
51	HTTP request smuggling	PortSwigger smuggling labs	PortSwigger "Request smuggling"
52	JWT zaifliklari	jwt.io + JWT labs	PortSwigger "JWT attacks"
53	OAuth zaifliklari	PortSwigger OAuth labs	PortSwigger OAuth
54	Deserialization	PortSwigger Insecure deserialization	PortSwigger
55	DVWA final: all darajalar	DVWA high level complete	DVWA (Docker'da)
56	OWASP Juice Shop	20 ta challenge solve	juice-shop (GitHub) + pwntester hints
57	Web security checklist writing	O'z checklist'ingni GitHub'ga qo'y	—
58	XSS/SQLi payload kolleksiyasi	PayloadsAllTheThings study	swisskyrepo/PayloadsAllTheThings
59	Mini CTF: web	HTB free web machine "Lame"-kabi easy box	HTB Starting Point
60	Month 2 exam	THM "Web Application Basics" + all notalar	THM

📅 MONTH 3: NETWORK PENTESTING + AD (61-90)

Day	Topic	Practice	Source
61	Pentest metodologiyasi (PTES/OSSTMM)	PTES bosqichlarini yozib chiq	pentest-standard.org
62	Passive recon	whois, dnsrecon, theHarvester	THM "Passive Reconnaissance"
63	Active recon	Amass, subfinder with real scope'da (o'z domain)	THM "Active Reconnaissance"
64	Metasploit fundamentals	msfconsole with 2 ta easy box	THM "Metasploit: Introduction"
65	Payload arxitekturasi	msfvenom with payload createish (labda)	THM "Shell & Payloads"
66	SMB/NetBIOS	enum4linux, smbclient with enum	HTB Academy "SMB Enumeration"
67	SMB zaifliklari (EternalBlue)	Metasploit'da MS17-010 lab	THM "Blue" (free room)
68	SNMP	onesixtyone, snmpwalk	THM "SNMP"
69	FTP, SMTP	anonymous FTP, user enumeration	HTB Academy modullari
70	SSH zaifliklari + brute	Hydra + weak creds lab	THM "Hydra" again
71	RDP	rdesktop, BlueKeep lab	THM "Blue" uslubi
72	Password dumping: hash turlari	NTLM vs Kerberos farqi	THM "Windows Internals"
73	Kerberos fundamentals	Kerberos protokolini chizma qilib draw	HTB Academy "Kerberos 101"
74	Kerberoasting	Impacket GetUserSPNs	THM "Kerberoasting"
75	AS-REP Roasting	Impacket GetNPUsers	HTB Academy
76	NTLM relay	Responder + relay lab	THM "Responder"
77	LLMNR/NBT-NS poisoning	Responder with hash olish	THM "Responder"
78	BloodHound	lab domenda BloodHound yuritish	THM "BloodHound"

Day	Topic	Practice	Source
79	AD attack path analysis	Shortest path topish mashqi	BloodHound docs
80	AD privilege escalation	PowerView with misconfig topish	THM "PowerShell/AD Enumeration"
81	Lateral movement	Pass-the-hash Impacket psexec	HTB Academy "Lateral Movement"
82	Pivoting fundamentals	SSH tunnel, chisel	THM "Pivoting/Tunneling"
83	Ilg'or tunneling	Proxychains + chisel zanjir	THM "Tunneling" again
84	Port forwarding	socat, rinetd	HTB Academy
85	Linux privesc	SUID, sudo, cron misconfig	THM "Linux PrivEsc"
86	Linux privesc 2	LinPEAS + 3 ta exercise	THM "Linux PrivEsc" continued
87	Windows privesc	Service, registry, AlwaysInstallElevated	THM "Windows PrivEsc"
88	Windows privesc 2	WinPEAS + kernel exploits	THM "Windows PrivEsc" continued
89	Post-exploitation	Credential dump concepts (lab)	THM "Post Exploitation Basics"
90	Month 3 CTF day	HTB Starting Point: all Tier 0-1	HTB Starting Point

📅 MONTH 4: BUG BOUNTY + RECON (91-120)

Day	Topic	Practice	Source
91	Bug bounty ekotizimi	HackerOne/Bugcrowd public reportlar o'qish (50 ta)	HackerOne Hacktivity
92	Scope analysis	real programma scope'ini analyze	HackerOne API/public programs
93	Subdomain enumeration	subfinder, amass, assetfinder	THM "Subdomain Enumeration"
94	DNS/Port recon	nuclei preview + naabu	ProjectDiscovery docs
95	HTTP probing, fingerprinting	httpx, whatweb, wappalyzer	ProjectDiscovery
96	Content discovery	ffuf, gobuster, feroxbuster	THM "Content Discovery"
97	Parameter discovery	Arjun, param-mining	PortSwigger blog
98	Google dorking	GHDB with exercise	exploit-db Google Hacking DB
99	GitHub recon	trufflehog, gitleaks (o'z repoda)	THM "GitHub Recon"
100	Shodan/Censys	Banner hunting mashqi	THM "Shodan" / "Search Engine Recon"
101	Recon automation	O'z recon pipeline scriptini write (bash+python)	—
102	VPS/Recon CTF I	HTB recon-heavy box	HTB Easy boxes
103	Recon CTF II	THM "Osiris"-kabi room	THM
104	Hisobot writing (PoC)	Birinchi professional report formatini write	HackerOne report templates
105	CVSS 3.1	10 ta zaiflikni baholash	first.org CVSS calculator
106	Duplicate oldini olish	Unique logic bug concepts	@Jhaddix "Bug Hunter's Methodology" (YouTube, free)
107	Recon maket	1 kun: real (ruxsat etilgan) target'da to'liq recon	Scope doirasida
108	Mobil pentest fundamentals	MobSF installation	THM "Mobile Pentesting" introduction
109	Android security	APK decompile (jadx), Frida preview	THM "Android Analysis"

Day	Topic	Practice	Source
110	iOS fundamentals	Tushunchalar + checklist	OWASP MASVS
111	API bug bounty metodologiyasi	OWASP API Top 10'dan amaliy	THM "API Attacks"
112	Wayback/archive recon	web.archive.org + waybackurls	tomnomnom/waybackurls
113	JS file analysis	JS secret hunting	LinkFinder
114	Takeover zaifliklari	Subdomain takeover theory + lab	THM "Subdomain Takeover"
115	Open redirect	lab writing	PortSwigger materials
116	Rate limit / brute force logic	Test metodikasi	OWASP Testing Guide
117	Affiliate/info disclosure	Sensitive data exposure lab	PortSwigger "Information disclosure"
118	Mini bug bounty simulyatsiya	VAmPI/crAPI'da 3 bug top	GitHub crAPI
119	Report writing	Topilgan bug'larga formal report	—
120	Month 4 exam	THM "Junior Penetration Tester" path review	THM

📅 MONTH 5: eJPT + CPTS PREPARATION (121-150)

Day	Topic	Practice	Source
121	eJPT syllabus analysis	Syllabus checklist create	INE free courses (free plan)
122	Assessment metodologiyasi	PTES bosqichlarni labga qo'llash	INE Free
123	Host/network auditing	3 ta exercise: full nmap scan pipeline	THM
124	Web application auditing	Burp'da systematic test	PortSwigger review
125	Exploitation: public exploit	Exploit-DB'dan exploit moslashtirish	THM "Exploit Vulnerabilities"
126	Exploit modifikatsiya	PoC'ni o'z labga moslash	Exploit-DB
127	Post-exploitation	PrivEsc + hash dump (lab)	THM PrivEsc rooms
128	Pivoting + lateral	2-hop lab yechish	THM Pivoting
129	Reporting	eJPT uslubida report write	INE template
130	eJPT mock I	THM "eJPT pathway" network lab	THM
131	eJPT mock II	THM "eJPT pathway" web lab	THM
132	eJPT mock III	24-soat simulyatsiya	THM
133	CPTS metodologiyasi	HTB Academy CPTS path boshlash	HTB Academy (free modullar)
134	Information gathering	HTB Academy recon moduli	HTB Academy
135	Vulnerability assessment	Nessus Essentials (free) install	Tenable free
136	Web exploitation	HTB Academy web moduli	HTB Academy
137	Shells & payloads	Reverse shell cheat sheet writing	revshells.com
138	PrivEsc deep	GTFobins + LOLBAS	gtfobins.github.io, lolbas-project.github.io
139	AD attacks 1	Kerberoasting + Pass-the-Hash	HTB Academy AD moduli
140	AD attacks 2	Full chain lab	HTB Academy

Day	Topic	Practice	Source
141	Reporting standartlari	Executive + technical report writing	HTB CPTS report template
142	Vulnerability scanning deep	OpenVAS/GVM install	Greenbone docs
143	Nmap script writing	O'z NSE scriptini writing	nmap.org/nsedoc
144	Metasploit deep	Resource files, meterpreter scripting	THM "Metasploit" again
145	Mimikatz concepts	lab: LSASS dump (o'z VM)	THM "Credential Harvesting"
146	File transfer texnikalari	SMB, HTTP, DNS exfil (lab)	HTB Academy "File Transfers"
147	Anti-forensics fundamentals	Timestamps, logs concept	THM "Digital Forensics" introduction
148	Full pentest lab I	HTB "vulnnet"-kabi box full chain	HTB free
149	Full pentest lab II	Yaxshi yozilgan report with	HTB free
150	eJPT examiga ariza	Imtihon (or keyingi oyga)	INE Security

📅 MONTH 6: CLOUD SECURITY (151-180)

Day	Topic	Practice	Source
151	Cloud arxitekturasi	3 cloud farqlash jadvali	AWS Skill Builder (free) "Cloud 101"
152	AWS free account + IAM	IAM user/policy lab (free tier)	AWS free tier
153	AWS S3 security	Public bucket misconfig lab	THM "AWS Basics"
154	AWS EC2	Free tier'da VM + security group	AWS free tier
155	AWS VPC	Custom VPC createish	AWS docs
156	CloudTrail/Logging	Log analysis lab	THM "Cloud Security"
157	AWS pentest metodologiyasi	pacu tool with lab	RhinoSecurityLabs/pacu
158	AWS privesc	IAM privilege escalation paths	RhinoSecurityLabs IAM research
159	GCP fundamentals	Free tier + IAM	GCP free tier
160	GCP storage/pentest	Bucket enum	THM "GCP Basics"
161	Azure free + Entra ID	Free tenant + RBAC	Azure free
162	Azure Storage	Misconfig lab	THM "Azure" rooms
163	Container fundamentals	Docker with 3 контейнер ishga tushirish	Docker docs + TryHackMe "Docker"
164	Docker security	Docker escape tushunchalari	THM "Docker Forensics/Intro"
165	Kubernetes fundamentals	Minikube'da cluster	killer.sh free alternatives / KodeKloud free labs
166	K8s security	RBAC + etcd misconfig	KodeKloud / madhuakula/kubernetes-goat
167	Cloud recon tools	ScoutSuite install + o'z hisobing skan	ScoutSuite (GitHub)
168	IAM misconfig checklist	10 xavfli IAM pattern writing	Rhino labs research
169	Serverless security	Lambda misconfig concept	THM
170	CI/CD security	Pipeline misconfig lab	THM "CI/CD Security"
171	Supply chain fundamentals	Dependency confusion concepts	Alex Birsan research (o'qish)

Day	Topic	Practice	Source
172	Secrets management	Vault (HashiCorp) lab	Vault tutorial
173	Cloud logging/SIEM	Wazuh + cloud log	Wazuh free docs
174	Threat detection fundamentals	Sigma rules writing	sigmahq.io
175	Incident response fundamentals	NIST IR bosqichlari lab	THM "Incident Response"
176	Digital forensics 1	Disk image analysis	THM "Digital Forensics"
177	Digital forensics 2	Autopsy with case	THM "Autopsy"
178	Memory forensics	Volatility lab	THM "Volatility"
179	Malware analiz 1	strings, PE analiz	THM "Malware Analysis" continued
180	Month 6 CTF day	HTB Cloud-lab or THM cloud rooms	THM/HTB

📅 MONTH 7: BINARY EXPLOITATION (181-210)

main manba: pwn.college (100% free, Arizona State universiteti) — bu oyni butunlay unga bag'ishla.

Day	Topic	Practice	Source
181	Assembly fundamentals	x86-64 10 dastur writing	pwn.college "Assembly"
182	Binary tuzilishi, ELF	gdb with binary analysis	pwn.college "Reverse Engineering"
183	Stack tuzilishi	Stack frame chizma	LiveOverflow YT (beplat series)
184	Buffer overflow fundamentals	Basic overflow lab	pwn.college "Binary Exploitation"
185	Stack overflow + control EIP	32-bit exploit writing	pwn.college
186	Shellcode writing	execve shellcode	pwn.college
187	Ret2libc	libc exploit	pwn.college
188	ROP fundamentals	ROP chain writing	pwn.college "ROP"
189	Format string	%n exploit lab	pwn.college
190	Heap fundamentals	Malloc tuzilishi	pwn.college "Heap" introduction
191	Heap exploitation 2	Tcache attack lab	pwn.college
192	SEH/DEP/ASLR	Proteksiyalarni chizma qilib draw	pwn.college
193	Bypass ASLR	Info leak + exploit	pwn.college
194	Windows binary exploitation	Immunity/kali'da exercise	HTB Academy "Windows BOF"
195	Fuzzing fundamentals	AFL libFuzzer exercise	AFL docs
196	Windows kernel concepts	Kernel exploit theory	HackTricks
197	Antivirus evasion fundamentals	Static vs dynamic detection	THM "AV Evasion" introduction
198	AMSI bypass concepts	Labda AMSI patch	THM "Amsi Bypass"
199	PowerShell obfuscation	Invoke-Obfuscation	THM "PowerShell"
200	C2 fundamentals	Sliver (ochiq kodli) labda	sliver.sh docs
201	Reverse engineering 1	crackme challenge	crackmes.one
202	RE 2	Ghidra with decompile	NSA Ghidra + LiveOverflow
203	RE 3	HTB reversing easy challenges	HTB
204	Malware dev tushunchalari (lab)	O'z VM'da loader concept	Maldev Academy free parts

Day	Topic	Practice	Source
205	Crypto attacklar	Padding oracle, RSA basics	cryptohack.org
206	Crypto 2	RSA modul	cryptohack.org
207	picoCTF binary	10 ta binary challenge	picoCTF
208	pwn.college review	Yetmagan modular	pwn.college
209	HackTheBox binary box	1 ta easy pwn box	HTB
210	Month 7 exam	O'z exploit note'larini GitHub'ga qo'y	—

📅 MONTH 8: RED TEAM (211-240)

Day	Topic	Practice	Source
211	Red team vs pentest farqi	Adversary emulation diagramma	MITRE ATT&CK
212	MITRE ATT&CK deep	Tacticlarni xaritalash	attack.mitre.org
213	Initial access: phishing simulyatsiya	lab'da go-phish (o'z lab)	GoPhish docs
214	Persistence: Windows	Autorun, scheduled task lab	THM "Persistence"
215	Persistence: Linux	cron, systemd backdoor (lab)	THM
216	Credential access	Dumping, DPAPI lab	HTB Academy
217	Lateral movement deep	WMI, WinRM, DCOM	HTB Academy
218	AD full attack chain lab	THM "Attacktive Directory"	THM
219	AD full chain 2	HTB Academy "AD Enumeration & Exploitation"	HTB Academy
220	Domain dominance	Golden ticket concept lab	HTB Academy
221	Defense evasion	Log tampering concept	HTB Academy
222	C2 deep	Sliver/Mythic beacon lab	Mythic docs
223	Exfiltration	DNS/HTTPS exfil lab	THM "Data Exfiltration"
224	Purple team concepts	Detection writing attackga qarshi	Sigma rules
225	Detection engineering	YARA rule writing	YARA docs + THM "YARA"
226	Threat hunting	ELK'da hunt lab	THM "Elastic Stack"
227	SIEM deep	Splunk free lab	THM "Splunk" rooms
228	Network detection	Zeek/Suricata lab	THM "Zeek"
229	Red team lab qurish	O'z AD lab'ini (GOAD) install	Orange-Cyberdefense/GOAD (free)
230	GOAD'da attack I	Recon + initial access	GOAD docs
231	GOAD'da attack II	Kerberoasting full chain	GOAD
232	GOAD'da attack III	Relay attacks	GOAD
233	Ilg'or pivoting	Double pivot lab	HTB Academy
234	Red team reporting	ATT&CK-mapped report	—
235	THM "Adversary Emulation"	APT29 simulation room	THM
236	OSEP uslublarini tanish	Evasion fokuslar	OffSec syllabus (o'qish)
237	OSWE uslublari	White-box web exploit	HTB Academy "Web Requests" deep

Day	Topic	Practice	Source
238	CERTO uslublari	C2 fokus	THM
239	Bof (beacon object files)	Bof writing mashqi	trustedsec bof GitHub
240	Month 8 CTF day	HTB Pro Labs preview (free bo'lsa) or THM network labs	HTB/THM

📅 MONTH 9: INTENSIVE BUG BOUNTY + PORTFOLIO (241-270)

Day	Topic	Practice	Source
241	real programma tanlash	1 ta real public program tanlash	HackerOne
242	Recon pipeline	Avtomatik recon script writing	—
243	Content discovery real target	ffuf mass scan	—
244	Manual testing I	Burp'da systematic	—
245	Manual testing II	Auth logic	—
246	Manual testing III	Business logic	—
247	finding tasdiqlash	PoC writing	—
248	Report writing	Full report	HackerOne templates
249	Tool createish 1	Python recon tool	python docs
250	Tool createish 2	Vulnerability scanner	—
251	Tool createish 3	Exploit script	—
252	Tool createish 4	GitHub'ga qo'yish	GitHub
253	GitHub profiling	README portfolio	—
254	Portfolio website	GitHub Pages with site	pages.github.com (free)
255	Texnik blog 1	HTB writeup writing	Medium/Dev.to free
256	Texnik blog 2	Writeup seriyasi	—
257	LinkedIn optimizatsiya	Profile update	LinkedIn
258	CV writing	ATS-friendly CV	—
259	Katta lab I	THM "Wreath" network	THM
260	Katta lab II	THM network labs continued	THM
261	Katta lab III	HTB Academy path lab	HTB Academy
262	Katta lab IV	Full chain + report	—
263	Retest and verification	lab'ni 2-marta yechish (speed focus)	—
264	Speed hack: easy boxes	3 box / 1 kun	HTB/THM
265	Speed hack 2	3 box / 1 kun	HTB/THM
266	CEH preparation 1	CEH syllabus review	EC-Council free materials/quiz
267	CEH preparation 2	Practice questions	boson/examtopics preview
268	PenTest+ preparation 1	Syllabus + practice	Professor Messer YT (free)
269	PenTest+ preparation 2	Practice exams	—

Day	Topic	Practice	Source
270	Month 9 exam	THM "Jr Penetration Tester" path review	THM

📅 MONTH 10: BIG TECH PREPARATION (271-300)

Day	Topic	Practice	Source
271	Security engineer rollari	Google/Meta/AWS job postlari study	career pages
272	Threat modeling STRIDE	real app'ga STRIDE qo'llash	OWASP Threat Modeling
273	Threat modeling 2	DFD drawing	OWASP Threat Dragon (free)
274	Secure code review	SonarQube'da kod skan	SonarQube Community
275	Secure coding: Python	Bandit ile skan	bandit docs
276	Secure coding: Go	Go vuln check	gosec
277	Python deep automation	Scapy with packet craft	scapy docs
278	Python deep 2	Requests, asyncio recon	—
279	Go fundamentals	Go'da port scanner write	A Tour of Go (free)
280	Rust fundamentals	Rust'da TCP scanner	Rust book (free)
281	System design (security)	Secure architecture design exercise	—
282	System design 2	Scaling + auth design	—
283	Incident response deep	Tabletop exercise	NIST SP 800-61
284	Detection engineering 2	Sigma + detection-as-code	sigmahq.io
285	Threat intel fundamentals	MISP install	MISP docs
286	Threat intel 2	STIX/TAXII lab	THM "Threat Intel"
287	Adversary simulation 2	ATT&CK Navigator plan	MITRE Navigator
288	Cloud security ops	CSPM tushunchalari	THM Cloud rooms
289	Mobile platform security	MASVS checklist	OWASP MASVS
290	AI/ML security	Prompt injection lab	Gandalf (Lakera) + OWASP LLM Top 10
291	AI/ML security 2	Adversarial ML concept	OWASP ML Top 10
292	Supply chain deep	SBOM createish	CycloneDX tools
293	Compliance fundamentals	ISO 27001, SOC 2 overview	THM "GRC"
294	Cryptography ilovasi	TLS misconfig analysis	testssl.sh
295	Web3 concepts (bonus)	Blockchain security fundamentals	THM "Blockchain"
296	Wireless security	WiFi 4-way handshake lab	THM "WiFi" (aloha lab)
297	Physical/social eng concept	OSINT framework	osintframework.com
298	OSINT exercise	Sherlock, Maltego CE	sherlock-project
299	Interview prep fundamentals	Security interview savollari	GitHub "cybersecurity-interview-questions"
300	Month 10 exam	Full mock test (CEH/PenTest+ savollari)	—

📅 MONTH 11: OSCP PREPARATION (301-330)

Day	Topic	Practice	Source

361	final CTF	1 katta CTD (HTB CTF, picoCTF)	—
362	1-yillik review	all nota'larni consolidate	—
363	Portfolio final review	all platforma profillari	—
364	2-yil reja	OSEE/OSEP/GXPN path writing	—
365	□	O'z blog'ga 1-yillik journey post writing	—

□ COSTS (IMPORTANT)

- 100% FREE SECTIONS: 1–9 oylar (THM free, PortSwigger, pwn.college, HTB Academy free modullar, OverTheWire).
- PAID OPTIONS: OSCP (~\$1,700), eJPT (~\$250), CEH (~\$1,200), PNPT (~\$410). Bu yerda echim: tryhackme/htb VIP o'rniga free tier + ishga kirib employer to'lashi; or avval eJPT (eng arzon professional) olib, qolganini ish puli with olish. Ko'pchilik shu yo'l with boradi.
- A certificate is not required for Big Tech — portfolio + GitHub + lab writeups + interview ko'nikmasi main.

⚡ **SUCCESS RULES**

1. Dayiga kamida 4 soat, jurnal + GitHub commit.
2. Never "theory tugadi" deb lab qilmang — lab birinchi.
3. Every Sunday: review + write a write-up.
4. Join Discord communities (HTB Discord, THM Discord) — networking 60% muhim.
5. Take the exam "preparation tugaganda" emas, on the scheduled date topshir.
